**VILLAGE OF CATSKILL**

**SEWER USE ORDINANCE**

Revised and adopted – January 26, 2010

TABLE OF CONTENTS

SEWER USE ORDINANCE

	<u>PAGE</u>
Art. I, Sect. 1-26.....	1 – 3
Art. II, Sect.. 1-7 .....	3 – 5
Art. III, Sect. 1-8 Private Sewage Disposal .....	5 – 6
Art. IV, Sect. 1-11 Building Sewers & Connections .....	7 - 8
Art. V, Sect.1-10 Use of Public Sewers .....	8 – 12
Art. VI, Sect. 1 Protection From Damage .....	13
Art. VII, Sect. 1-3 Powers and Authority of Inspectors .....	13
Art. VIII, Sect. 1 Information .....	14
Art. IX, Sect. 1-3 Penalties .....	14 - 15

VILLAGE OF CATSKILL

SEWER USE ORDINANCE

ARTICLE I

Unless the context specifically indicates otherwise, the meaning of the terms in this ordinance shall be as follows:

**SECTION 1.** "BOD" (denoting Biochemical Oxygen Demand) shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days at 20 C, expressed in milligrams per liter.

**SECTION 2.** "Building Drain" shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer, beginning five (5) feet (1.5 meters) outside the inner face of the building wall.

**SECTION 3.** "Building Sewer" shall mean the extension from the building drain to the public sewer or other place of disposal.

**SECTION 4.** "Combined Sewer" shall mean a sewer receiving both surface runoff and sewage.

**SECTION 5.** "Garbage" shall mean solid wastes from the domestic and commercial preparation, cooking and dispensing of food and from the handling, storage and sale of produce.

**SECTION 6.** "Industrial Wastes" shall mean the liquid wastes from industrial manufacturing processes, trade, or business as distinct from sanitary sewage.

**SECTION 7.** "Natural Outlet" shall mean any outlet into a watercourse, pond, ditch, lake, or other body of surface or groundwater.

**SECTION 8.** "Persons" shall mean any individual, firm, company, association, society, corporation or group.

**SECTION 9.** "pH" shall mean the logarithm of the reciprocal of the weight of hydrogen ions in grams per liter of solution.

**SECTION 10.** "Properly Shredded Garbage" shall mean the wastes from the preparation, cooking and dispensing of food that have been shredded to such a

degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half (1/2) inch (1.27 centimeters) in any dimension.

**SECTION 11.** "Public Sewer" shall mean a sewer in which all owners of abutting properties have equal rights and is controlled by public authority.

**SECTION 12.** "Sanitary Sewer" shall mean a sewer which carries sewage and to which storm, surface and ground waters are not intentionally admitted.

**SECTION 13.** "Sewage" shall mean a combination of the water carried wastes from residences, business buildings, institutions and industrial establishments, together with such ground, surface and storm waters as may be present.

**SECTION 14.** "POTW Treatment Plant" shall mean any arrangement of devices and structures used for treating sewage.

**SECTION 15.** "Publicly Owned Treatment Works" shall mean all facilities for collection, pumping, treating and disposing of sewage.

**SECTION 16.** "Sewerage" shall mean a pipe or conduit for carrying sewage.

**SECTION 17.** "Shall" is mandatory; "May" is permissive.

**SECTION 18.** "Slug" shall mean any discharge of water, sewage or industrial waste, which in concentration of any given constituent or in quantity of flow, exceeds for any period of longer than fifteen (15) minutes, more than five (5) times the average twenty-four (24) hour concentration or flows during normal operation.

**SECTION 19.** "Storm Drain" (sometimes termed "storm sewers") shall mean a sewer which carries storm and surface waters and drainage but excludes sewage and industrial wastes, other than unpolluted cooling water.

**SECTION 20.** "Superintendent" shall mean the Superintendent of Public Works or Sewers of the Village or his authorized deputy, agent or representative.

**SECTION 21.** "Suspended Solids" shall mean solids that either float on the surface of, or are in suspension in water, sewage or other liquids and which are removable by laboratory filtering.

**SECTION 22.** "Watercourse" shall mean a channel in which a flow of water occurs, either continuously or intermittently.

**SECTION 23.** "Village " shall mean the incorporated municipal subdivision which shall be represented by the Village Board of Trustees.

**SECTION 24.** "NYSDEC" shall mean the New York State Department of Environmental Conservation or duly authorized official of said department.

**SECTION 25.** "USEPA" shall mean United States Environmental Protection Agency or duly authorized official of said agency.

**SECTION 26.** "SPEDS" shall mean State Pollution Discharge Elimination System.

## ARTICLE II

**SECTION 1.** It shall be unlawful for any person to place, deposit or permit to be deposited in any unsanitary manner on public or private property within the Village or in any area under the jurisdiction of said Village, any human or animal excrement garbage, or objectionable waste.

**SECTION 2.** It shall be unlawful to discharge to any natural outlet within the Village or in any area under the jurisdiction of said Village, any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this ordinance.

**SECTION 3.** Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool or other facility intended or used for the disposal of sewage.

**SECTION 4.** The owner of all houses, buildings or properties used for human occupancy, employment, recreation or other purposes, situated within the Village and abutting on any street, alley or right-of-way in which there is now located or may in the future be located a public sanitary or combined sewer of the Village, is hereby required, at his expense, to install suitable toilet facilities therein and to connect such facilities directly with the ordinance, within ninety (90) days after date of official notice to do so, provided that said public sewer is within one hundred twenty (120) feet of the property line. A suitable pump or ejector will be furnished by the property owner, where necessary to overcome adverse conditions of grade, slope, or topography.

All piping and fixtures for the removal of sewage, from the building served to the sewer main, shall be maintained and/or repaired by the property owner. If for any reason a leak develops on the sewer service line or any fixtures thereof, the owner shall take immediate steps to repair same. The cost of repairs must be born

by the property owner as he/she is responsible for the sewer service line from the connection at the sewer main to the premises it services. In the event of unreasonable delay in the prosecution of the repair work, due notice will be given by the Superintendent of Public Works to the owner or the tenant of the premises to start the necessary repairs within twenty-four (24) hours. Upon failure of the owner to effect repairs within the period, the Department of Public Works may repair the break and the cost of repairs shall be levied against the owner. The determination of the responsibility involved, whether the Village of Catskill or the property owner, shall rest with the Village Board of Trustees and the Superintendent of Public Works and their decision shall be final.

Where an emergency shall exist upon the occasion of a break on a sewer service line, the Superintendent may make the necessary repairs with Department of Public Works forces without notice to the property owner. However, the costs involved in the prosecution of the work will be assessed against the property owner.

Charges for the work undertaken by the Department of Public Works will be from the fee schedule set up by said department.

**SECTION 5. CAPITAL COSTS:** Any new sewer connections, either commercial, multi-family housing, or residences containing five (5) or more bedrooms, outside the Village of Catskill limits, may connect after agreeing to pay the required tapping fee and a capital cost reimbursement. The cost of this reimbursement is determined by dividing the estimated sewer usage of the location per day, by the total usage of the Village sewer system per day and then multiplying the number by the estimated worth of the Village sewer system. Said worth to be determined by the most recent appraisal.

Any new sewer system connections for residences containing four (4) bedrooms or less, outside the Village of Catskill limits, shall pay the required tapping fees plus a capital cost reimbursement of \$2000.00 (two thousand dollars).

Payments of all costs must be made in full before sewer service is connected to the location.

**SECTION 6.** Installation of sewer mains outside the limits of the Village of Catskill shall be allowed after approval is given by the Village Board of Trustees and the Superintendent of Public Works or his duly appointed agent and all necessary agreements and permits have been executed. All construction, attorney's, engineering, and/or inspection fees incurred for main extensions, outside the Village of Catskill limits, shall be borne in their entirety by the sewer users of that new installation.

The sewer main extensions are to be made in accordance with plans and specifications approved by the Superintendent of Public Works, and shall be under the supervision and inspection of the Superintendent of Public Works. The Superintendent of Public Works will inspect and accept all sewer mains before connection to the sewer system.

**SECTION 7. MAIN EXTENSIONS:** No sewer main extension shall be made on any street that has not been accepted as such by the Board of Trustees without prior approval.

In the case of a developer changing undeveloped areas into streets and building lots, within the limits of the Village of Catskill and seeking sewer main extensions, same may be granted under the following conditions:

- (a) The developer must pay for all excavation and back fill, same being done under the supervision of the Superintendent of Public Works or his agent. The mains, and installation of same, shall be paid by the developer.
- (b) The developer must file with the Village Board of Trustees a copy or the map of the proposed development, drawn to scale and indicated thereon all proposed streets and building lots.

In the case of a developer of undeveloped property outside the limits of the Village of Catskill wishing to develop said property into streets and building lots and seeking sewer main extensions on same, may be granted permission under the following conditions:

- (a) The development must be in a currently established sewer district or must establish a new sewer district or become annexed to the Village.
- (b) The entire cost of installation must be paid by the developer and the installation must be under the supervision of the Superintendent of Public Works or his duly authorized agent.

### ARTICLE III

#### PRIVATE SEWAGE DISPOSAL

**SECTION 1.** Where a public sanitary or combined sewer is not available under the provisions of Article II, Section 4, the building sewer shall be connected to a private sewage disposal system complying with the provisions of the article.

**SECTION 2.** Before commencement of construction of a private sewage disposal system the owner shall first obtain written permission signed by the Superintendent and approved by the Village Board of Trustees. A permit and inspection fee of \$100.00 shall be paid to the Village at the time of the application.

**SECTION 3.** A permit for a private sewage disposal system shall not become effective until the installation is completed to the satisfaction of the Superintendent. He shall be allowed to inspect the work at any stage of construction and in the event the applicant for the permit shall notify the Superintendent when the work is ready for final inspection and before any underground portions are covered. The inspection shall be made within seventy-two (72) hours of the receipt of notice by the Superintendent.

**SECTION 4.** The type, capacities, location and layout of a private sewage disposal system shall comply with all recommendations of the Department of Health of the State of New York. NO permit shall be issued for any private sewage disposal system employing subsurface soil absorption facilities where the area of the lot is less than fifteen hundred (1500) square feet. NO septic tank or cesspool shall be permitted to discharge to any natural outlet.

**SECTION 5.** At such time as a public sewer becomes available to a property served by a private sewage disposal system, as provided in Article III, Section 4, a direct connection shall be made to the public sewer in compliance with this ordinance and any septic tanks, cesspools and similar private sewage disposal facilities shall be abandoned and filled with suitable material.

**SECTION 6.** The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the Village.

**SECTION 7.** No statement contained in the article shall be construed to interfere with any additional requirements that may be imposed by the Health Office of the County or State.

**SECTION 8.** When a public sewer becomes available, the building sewer shall be connected to said sewer within sixty (60) days and the private sewage disposal system shall be cleaned of sludge and filled with clean bankrun gravel or dirt.

## ARTICLE IV

### BUILDING SEWERS AND CONNECTIONS

**SECTION 1.** No unauthorized person shall uncover, make any connections with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Superintendent.

**SECTION 2.** There shall be two (2) classes of building sewer permits: (a) for residential and (b) for service to commercial establishments. In either case, the owner or his agent shall make application on a special form furnished by the Village. The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the Superintendent. A permit and inspection fee of one hundred fifty dollars (\$150.00) for a residential building sewer permit and three hundred dollars (\$300.00) for a commercial building sewer permit shall be paid to the Village at the time the application is filed.

**SECTION 3.** All costs and expenses incidental to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the Village from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer. If a property is torn down the sewer line must be capped and sealed with cement.

**SECTION 4.** A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another or an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer for connection purposes but as the true number of building for billing purposes.

**SECTION 5.** Old building sewers may be used in connection with new buildings only when they are found, on examination and tested by the Superintendent, to meet all requirements of this ordinance.

**SECTION 6.** The size, slope, alignment, materials of construction of a building sewer and the methods to be used in excavation, placing of the pipe, jointing, testing and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the Village. In the absence of code provisions or in amplification thereof, the materials and procedures set forth in appropriate specifications of the A.S.T.M. and W.P.C.F. Manual of Practice No. 9, shall apply.

**SECTION 7.** Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity to flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

**SECTION 8.** No person shall make connection of roof downspouts, exterior foundations drains, areaway drains or other sources of surface runoff or groundwater to a building sewer or building drain, which in turn is connected directly or individually to a public sanitary sewer.

**SECTION 9.** The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the Village or the procedures set forth in appropriate specifications of the A.S.T.M. and the W.P.C.F. Manual of Practice No. 9. All such connections shall be made gas tight and water tight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

**SECTION 10.** The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Superintendent or his representative.

**SECTION 11.** All excavations for building sewer installations shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the Village.

## ARTICLE V

### USE OF THE PUBLIC SEWERS

**SECTION 1.** No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water or unpolluted industrial process waters to any sanitary sewer.

**SECTION 2.** Storm water and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process water may be discharged on approval of the Superintendent to a storm sewer, combined sewer, or natural outlet. SPDES

requires that cooling water discharges to waters of the State must apply for SPDES permits and are subject to State and Federal regulations.

**SECTION 3.** No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

- (a) Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas.
- (b) Any waters or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to, cyanide in excess of two (2) mb/l as CN in wastes as discharged to the public sewer.
- (c) Any water or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment and personnel of the sewage works.
- (d) Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, wood, unground garbage, whole blood, paunch manure, hair and fleshing, entrails and paper dishes, cups, milk containers, etc. either whole or ground by garbage grinders.

**SECTION 4.** No person shall discharge or cause to be discharged the following described substances, materials, waters or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process or equipment, have and adverse effect on the receiving stream or can otherwise endanger life, limb, public property or institute a nuisance. In forming his opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of the wastes in the sewage treatment, and other pertinent factors. The substances prohibited are:

- (a) Any liquid or vapor which will result in the temperature exceeding 104 F (40 C) at the influent to the treatment plant.

- (b) Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may de-solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150) degrees F (0 and 65 C).
- (c) Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.
- (d) Any waters and wastes containing strong acid iron picking wastes or concentrated plating solutions whether neutralized or not.
- (e) Any waters or wastes containing iron, chromium, copper, zinc and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.
- (f) Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which be established by the Superintendent as necessary, after treatment of the composite sewage, to meet the requirements of the State, Federal, or other public agencies of jurisdiction for such discharged to the receiving waters.
- (g) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.
- (h) Any waters or wastes having a pH in excess of 9.5.
- (i) Materials which exert or cause:
  - (1) Unusual concentrations or inert suspended solids, such as, but not limited to, Fullers' earth, lime slurries and lime residues, or of dissolved solids, such as, but not limited to, sodium chloride and sodium sulfate.
  - (2) Excessive discoloration, such as, but not limited to, dye wastes and vegetable tanning solutions.

- (3) Unusual BOD, chemical oxygen demand or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.
- (4) Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.
- (j) Water or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving water.

**SECTION 5.** If any water or wastes are discharged or are proposed to be discharged to the public sewers, which waters contained the substances or possess the characteristics enumerated in Section 4 of the Article, and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment or receiving water or which otherwise create a hazard to life or constitute a public nuisance, and the Superintendent may:

- (a) Reject the wastes.
- (b) Require pretreatment to an acceptable condition for discharge to the public sewer
- (c) Require control over the quantities and rates of discharge and/or wastes not covered by existing taxes or sewer charges under the provisions of Section 10 of this Article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent and subject to the requirements of all applicable codes, ordinances and laws.

**SECTION 6.** Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of the type and capacity approved by the Superintendent and shall be located as to be readily and easily accessible for cleaning and inspection.

**SECTION 7.** Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

**SECTION 8.** When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observations, sampling and measurement of the wastes; such manhole, when required shall be accessibly and safely located and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at his expense and shall be maintained by him so as to be safe and accessible at all times.

**SECTION 9.** All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest editions of the "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally but not always, BOD and suspended solids analyses are obtained from 24 hour composites of all outfalls whereas pH's are determined from periodic grab samples).

**SECTION 10.** No statement contained in this article shall be construed as preventing any special agreement or arrangement between the Village and any industrial concern whereby an industrial waste of unusual strength of character may be accepted by the Village for treatment, subject to payment therefore, by the industrial concern. No special agreements shall circumvent Federal Categorical Pretreatment Standards.

## ARTICLE VI

### PROTECTION FROM DAMAGE

**SECTION 1.** No person shall maliciously, willfully or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

## ARTICLE VII

### POWERS AND AUTHORITY OF INSPECTORS

**SECTION 1.** The Superintendent and other duly authorized employees of the Village bearing proper credentials and identification, agents and employees of NYSDEC and USEPA, shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling and testing in accordance with the provisions of this ordinance. The Superintendent or his representative shall have no authority to inquire into any processes including metallurgical, chemical oil, refining, ceramic, paper or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or facilities for waste treatment.

**SECTION 2.** While performing the necessary work on private properties referred to in Article VII, Section 1 above, the Superintendent or duly authorized employees of the village shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the Village employees and the Village shall indemnify the company against liability claims and demands for personal injury or property damage assert against the company and growing out of negligence or failure of the company to maintain safe conditions as required in Article V, Section 8.

**SECTION 3.** The Superintendent and other duly authorized employees of the Village bearing proper credentials and identification shall be permitted to enter all private properties through which the Village holds a duly negotiated easement for the purpose of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the sewage works, lying within said easement. All entry and subsequent work, if any, on said easement shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

## ARTICLE VIII

### INFORMATION

**SECTION 1.** The POTW may request or take reasonable means to obtain information from the users of the system to determine compliance with the system, including but not limited to the following:

- (a) Wastewater discharge rate and volume over a specified time period.
- (b) Chemical analysis of wastewaters.
- (c) Information on raw materials, processes, and products affecting wastewater volume and quality.
- (d) Quantity and disposition of specific liquid, sludge, oil, solvent, or other materials important to sewer use control.
- (e) A plot plan of sewers.
- (f) Details of wastewater pretreatment facilities.
- (g) Spill control and prevention systems.

## ARTICLE IX

### PENALTIES

**SECTION 1.** Any person found to be violating any provision of this ordinance, except Article VI, shall be served by the Village with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

**SECTION 2.** Any person who shall continue any violation beyond the time limit provided for in Article IX, Section 1, shall be guilty of a misdemeanor and on conviction thereof, shall be fined in the amount not exceeding five hundred (\$500.00) dollars for each violation. If the provision violated is Article V, then the fine shall be five thousand (\$5000.00) dollars for each violation. Each day in which any such violation shall continue shall be deemed a separate offense.

**SECTION 3.** Any person violating any of the provisions of this ordinance shall become liable to the Village for any expense, loss, or damage occasioned by the Village by reason of such violation.

VILLAGE OF CATSKILL  
 WATER & SEWER RATES  
 EFFECTIVE – NOVEMBER 14, 2011

IN VILLAGE

RATES:

<u>UNITS*</u>	<u>WATER</u>	<u>SEWER</u>	<u>TOTAL</u>
0-10	\$3.30/UNIT	\$3.32/UNIT	\$66.20 -minimum bill- both services, \$33.00-water \$33.20-sewer
11-20	\$3.93/UNIT	\$4.08/UNIT	
21-40	\$4.23/UNIT	\$4.53/UNIT	
41 +	\$4.38/UNIT	\$4.81/UNIT	

OUTSIDE VILLAGE

RATES:

<u>UNITS*</u>	<u>WATER</u>	<u>SEWER</u>	<u>TOTAL</u>
0-10	\$6.66/UNIT	\$6.64/UNIT	\$133.00 -minimum bill- both services; \$66.00 water only \$66.40-mc-sewer
11-20	\$7.87/UNIT	\$8.16/UNIT	
21-40	\$8.47/UNIT	\$9.07/UNIT	
41 +	\$8.77/UNIT	\$9.63/UNIT	

**\*1 unit = 750 gallons or 100 cubic feet**
